DETAILED ACTION

Statement under § 3.73(b)

The consent of Assignee to reissue Application dated April 1st, 2002 is defective.

The consent and 3.73(b) must state that **assignee owns the entire right, title and interest**. A statement that company X is the sole assignee is not valid because you can be the sole assignee, but only own a percentage of the overall invention. If it is less than the overall invention, then the assignee must indicate the extent (by percentage) of its ownership interest. A statement of "sole assignee" does not establish a percentage of ownership as does the language "Assignee owns the entire right, title and interest".

Claim Rejections - 35 USC § 251

Claims 24 and 40 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly,

the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In the parent application 08/346,603, Applicant surrendered a broad claim 1 in view of an amended version in amendment 'A', dated March 07, 1996. Amendment 'A' specifically presents a claim which included the limitation "...wherein said video display generator display said n characters and said selection means comprises means for causing said character displays to cycle forward and backward through a plurality of alphanumeric characters and means for assigning one of said alphanumeric characters to each of said n characters."

On page 14 of the amendment 'A', applicant specifically argues, "Furthermore, even if the teachings of Reed are applied to either Young or Vogel, because Reed does not disclose how to select multiple characters in a title using only a remote control device, one of ordinary skill in the art would still not be processed of the invention described and claimed by applicants. For examples, parent application 08/346,603, claim 1 has been amended to recite i) that a plurality of characters in the title are input by the user, and ii) the specific means by which this is done – providing a user selection means "to cycle forward and backward through a plurality of alphanumeric characters" in order to locate each of the desired characters in the title."

At least the argued limitation of "cycle forward and backward through a plurality of alphanumeric characters" in claim 1 of the parent application 08/346,603 appears to be

absent from the reissue application claims 24 and 40. There doesn't appear to be a broader version of this argued limitation on the reissue application claims 24 and 40 in order to avoid recapture under Ex parte Eggert, see MPEP 1412.02
